

Meeting 11/30
GrubSplit

1. Overview of progress made
2. Remaining features
 - a. payment tracker
 - b. adding options to orders
 - i. definitely need to be able to place orders in final product
 - ii. would be nice if set to sandbox for ease of TA testing, but not necessary
 - c. inviting users to grub
 - i. URL works
 - ii. redirect from login page
 - d. tests
 - e. making grub page dynamic
 - i. unclear if this is possible with just ajax or if we'll need something like SocketIO
 - ii. should be more of a priority than adding new features
 - f. make restaurant search actually work - remove hard-coded bypass
3. Features potentially removed from product based on timeline
 - a. venmo integration - definitely not going to be implemented for final product. if there's time, focus on adding site responsiveness
