

Agenda 11/16

GrubSplit

1. Demo of our MVP
 - a. Still need to finish completing an order
 - i. add address/payment option in UI (already hooked up in API)
2. Features left for final version
 - a. Making UI more pleasing to the eye/responsive
 - i. Menu on restaurant page (should they be clickable?)
 - ii. Orders - changing name to "you" if you are the grub leader?
 - iii. Ordering subgrub page - alignment and receipt
 - b. Grub invitations
 - c. Subgrub smoothness
 - i. only allow users to create one subgrub (edit and delete it)
 - ii. if the user has a subgrub, create subgrub button should not appear
 - iii. can cancel a subgrub from the subgrub view and delete it from the grub view
 - d. Venmo integration
 - e. Full menu integration
 - f. Real search for restaurants instead of hard-coded Cafe 472 response
3. Technical Questions
 - a. How do we allow users to not have to continually log in?
 - i. cookies - tips on how to get started with this?
 - ii. we have two log-ins (one for GrubSplit and one for delivery.com) - how can we minimize the number of logins?
